

SEMI-AUTOMATIC FEED SYSTEM WITH MECHANICAL CLUTCH

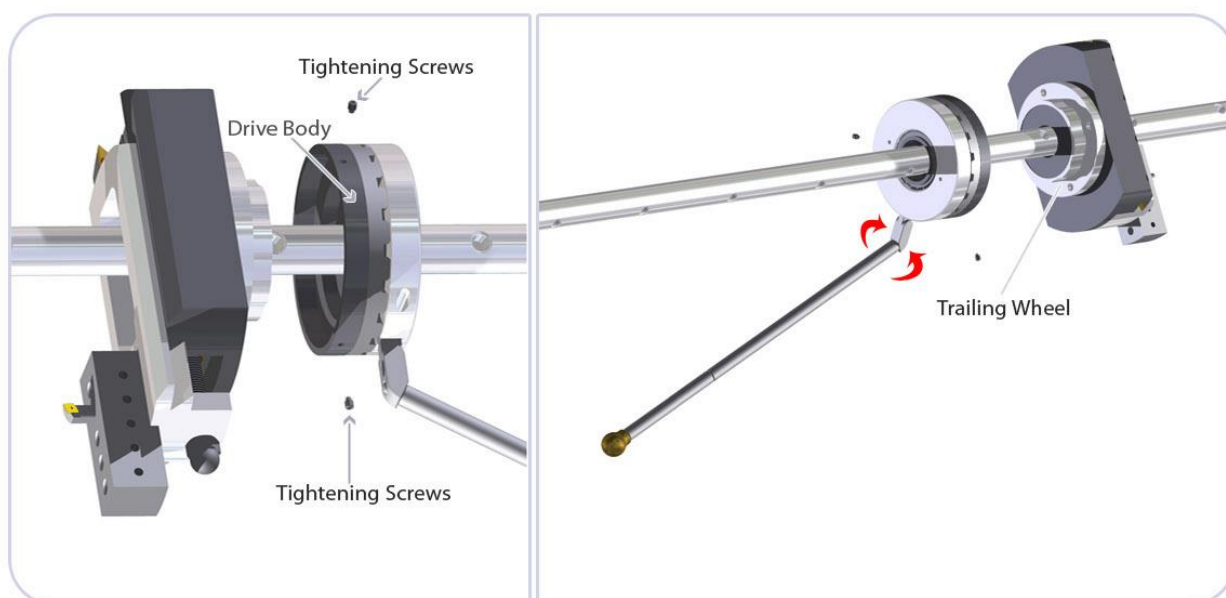

TECHNOLOGICAL INNOVATION

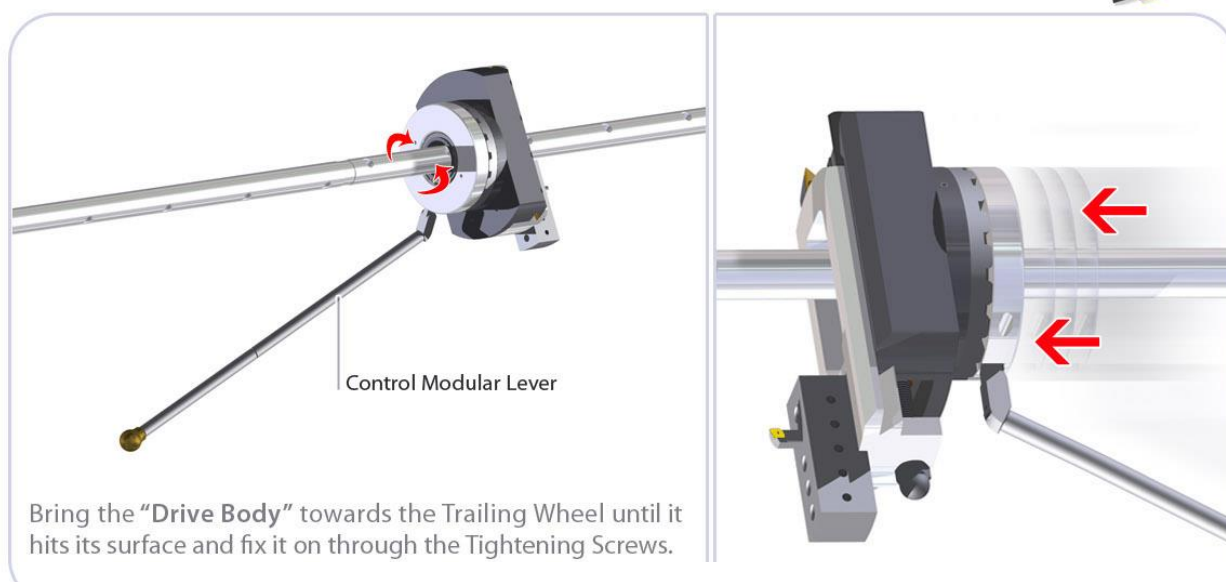

Confirming our competitiveness on the market through the constant application in the research and development activities, **SIR MECCANICA** is pleased to inform its customers about the production of a new mechanical device, exclusively designed for **KIT 2000**.

SEMI-AUTOMATIC FEED SYSTEM WITH MECHANICAL CLUTCH FOR KIT 2000

Simple, efficient and practical, this new mechanical device, available for every **KIT 2000** model, guarantees an excellent handling of the working operations.

A demonstrative video is available on our website www.sirmeccanica.com

Bring the "Drive Body" towards the Trailing Wheel until it hits its surface and fix it on through the Tightening Screws.
