

PUMA V series

PUMA V400/V550

High Performance Vertical Turning Center

Doosan Machine Tools

Optimal Solutions for the Future

PUMA V series

PUMA V400/V550

The vertical turning center is designed for long term accuracy, heavy duty cutting and to minimize floor space. Its powerful spindle drives, meehanite casting and integral box guide way provide unsurpassed rigidity.

New Standard for Unsurpassed High Productivity, High Speed and High Precision

PUMA V400 series

Main Spindle

The cartridge type spindle with A2#8 spindle nose assures high capability and easy of maintenance. Especially rigid coupled bearing assembly is to support heavy weight workpiece and reduces thermal growth in long run operation.

Max. spindle speed

Motor (30 min)

3000 r/min **22 kW (29.5 Hp)**

Main spindle power-torque diagram

12 (12+12)^{*1} stations

8 (8+8)^{*1} stations (opt)

*1 : PUMA V400-2SP

The large 12 station heavy duty turret features a large diameter Curvic coupling and heavy duty design with unsurpassed rigidity. Turret rotation, acceleration and deceleration are all controlled by a reliable high torque servo motor. Unclamp and rotation are virtually simultaneous. Its fast index response reduces the total cycle time

Rotary tool spindle power-torque diagram

PUMA V400M Radial BMT Turret

PUMA V400M : BMT65P

Rotary Tool Head

The new rotary tool head confirms the high rigidity and accuracy by simultaneous dual contact between the rotary tool head face and tool holding insert (called Preci-flex adapter) flange face as well as tool head pocket taper

Preci-flex adapter application

Collet application

Double-Paneled Safety Window

The operator safety can be enhanced through the front door with its shock absorbing laminated glass and double panel construction. The windows without grating also provide a clear view of the machine inside.

PUMA V550 series

Main Spindle

Main spindle power-torque diagram

Max. spindle speed

Motor (30 min)

2000 r/min 37 kW (49.6 Hp)

The cartridge-type precision spindle is assembled in a temperature controlled clean room. Four rows of high precision roller bearings and two rows of angular contact thrust bearings support the A2#11 American standard type spindle nose. The entire assembly is per-manently grease lubricated, which eliminates routine maintenance and reduces thermal growth. Twin spindle model(PUMA V550-2SP) have an independent direct drive system for each spindle. This permits either synchronous or asynchronous operation to double your productivity, or to machine complete components from each unit.

Rigidity Bed and Wide Working Range

X-axis travel

390 (490)*¹ mm
(15.35 (19.29) inch)

Z-axis travel

780 mm
(30.71 inch)

*1 : PUMAV550M

The one piece bed and box type column castings are rigid and heavily ribbed. Meehanite cast iron. These castings remain stable even under the heaviest cutting conditions. Fine grained Meehanite cast iron is used for its excellent vibration absorbing characteristics. The cross slide body is fully supported by the saddle in all positions and there is no table overhang.

Workpiece space and interference space

No. of tool station

**8 (8+8)^{*1}
stations**

^{*1} : PUMA V550-2SP : 8+8

The large 8 station heavy duty turret features a large diameter Curvic coupling and heavy duty design with unsurpassed rigidity. Turret rotation, acceleration and deceleration are all controlled by a reliable high torque servo motor. Unclass and rotation are virtually simultaneous. Its fast index response reduces the total cycle time required to machine parts.

Rotary tool spindle power-torque diagram

PUMA V550M BMT75P rotary spindle

PUMA V550M Radial BMT Turret

The turret features BMT75P style tooling in which the toolholders are mounted directly to the turret's periphery using 4 large bolts. This type of mounting system allows a extremely high degree of rigidity.

Index time (1-station swivel)

0.25 s

No. of tool station

12 stations

Preci-Flex Ready Rotary Tools

Preci-Flex ready rotary tool holders are available on the milling versions. Preci-Flex is a tooling system utilizes the existing ER collet taper in the rotary holders. The spindle face is precision ground relative to the taper and there are four drilled and tapped holders in this face. The Preci-Flex adapters locate on both the taper and the spindle face for maximum rigidity.

Preci-flex adapter application

Collet application

Double-Paneled Safety Window

The operator safety can be enhanced through the front door with its shock absorbing laminated glass and double panel construction. The windows without grating also provide a clear view of the machine inside.

{ } : Option

Standard Feature

- Coolant supply equipment
- Controller : Doosan Fanuc i series^{*1}
- Controller : Fanuc 31i^{*2}
- Full enclosure chip and coolant shield
- Hand tool kit, including small hand tool for operations
- Hydraulic chuck & actuating cylinder
- Hydraulic power unit
- Leveling jack screw & plates
- Lubrication equipment
- Soft jaws (total)
- Standard tooling kit (tool holders & boring sleeve)
- Work light

Optional Feature

- Air blast for chuck jaw cleaning
- Automatic door
- Automatic door with safety device
- Chip conveyor & Chip bucket
- Controller : Fanuc 32i^{*1}
- Coolant flushing
- Dual chucking pressure
- Hardened & ground jaws
- Manual tool presetter
- Oil skimmer
- Signal tower (yellow, red, green)
- Chuck clamp confirmation
- Special chucks
